

List ACTIEF!

List ACTIEF! Is committed to all the students of the faculty Social and Behavioural Sciences. List ACTIEF! considers it important that the student consultation of the FSS gets more support among the students of the FSS and that it is accessible to all students. For this reason it is vital that the student consultation does its work with passion.

List ACTIEF! originated from a group of representatives of the FSS. List ACTIEF! has thus been in the Faculty Council for many years and has built up a good relationship with the staff section, the faculty board, the Inspraak! and the different study associations. We are also well aware of everything that is going on within the faculty.

Our vision

- [Transparent and approachable student consultation](#)

Supporters

By being regularly present in the buildings of the FSS, we are clearly visible to our supporters. By regularly organising meetings, we try to involve our supporters as much as possible in student consultation. In addition, coffee hours regularly take place in the rooms of the study associations. Now that there are no possibilities for physical meetings due to the coronacrisis, we will actively commit to involving our supporters online. We want to be actively present, offline as well as online, for students.

Awareness of the student consultation

List ACTIEF! would like to see the awareness of the student consultation, the overarching body of the consultation of the Faculty of Social and Behavioural Sciences, grow. In this way we hope that more people will give their opinion, so that we can improve the faculty. We try to achieve this by attending meetings both inside and outside the faculty.

- [Student facilities](#)

Recording more lectures

By agreeing to the quality agreements, List ACTIEF! took the first steps towards recording all lectures in 2019-2020. List ACTIEF! wants to strive for even more lectures to be recorded this year. Students therefore have access to all the material discussed at any time. This could lead to better study results, since students can consult lectures before an exam again. Even now that all education is given online, it is not self-evident that lectures are recorded and remain available. List ACTIEF! wants to aim for more recorded lectures, both online and in the lecture halls.

Workplace optimisation

List ACTIEF! would like study rooms and landscapes to be adapted to the introduction of Bring Your Own Device (BYOD). For example, we would like to see more sockets in study rooms and study rooms and landscapes should be more BYOD friendly. This is especially important in the expected 1,5 meter society. Most likely, fewer students will be allowed to study in one room and problems will arise around study space capacity and the sharing of sockets. List ACTIEF! wants to ensure that students, when they go back to the University, have sufficient workplaces and that there are enough sockets available.

More technological knowledge for students and teachers

Now that more and more education is given online, technological knowledge is very important. No knowledge of the technological resources used can cause problems, which can result in wasting time and loss of quality of education. For this reason, it is important that students and teachers are aware of the most used programs and use them adequately.

Adjusting to the 1,5 meter society

List ACTIEF! considers it important that student facilities are optimal, even during the coronacrisis. We believe that taking exams from home should be done in a comfortable way for the student and not in a way that infringes on the student's privacy in an unacceptable manner. We want to ensure that studying during the coronacrisis at the FSS has as little negative impact as possible and that the faculty deals with the inevitable consequences as adequately as possible.

- **Student support**

Increased awareness of support functions for students

List ACTIEF! would like to see more awareness of the support functions for students to improve student guidance. These functions include the awareness of STIP, the tutors, the student psychologist and the study advisor. More clear guidance for students with mental health problems additionally seems like a valuable idea. We also want to make sure that the Faculty provides support to students who experience negative psychological consequences due to the coronacrisis. In this way, List ACTIEF! Wants to ensure that students experience their study time as well as possible.

More attention for optimising tutorship for the entire faculty

List ACTIEF! Would like to see that all students receive enough (individual) attention from their tutor during their study time. In addition, List ACTIEF! Wants to investigate how tutorship is structured for each study program, and where strengths and improvement lie.

- [Career orientation](#)

More awareness for career orientation inside and outside of the tutorship

One of the most central parts of the tutorship is career orientation. However, it is not always clear to students when they are busy with career orientation, there is resistance to career orientation as a compulsory part, or students have no idea what they can do with career orientation in addition to the compulsory parts. List ACTIEF! therefore finds it important that career orientation becomes a central part of the tutorship.

Increasing the visibility of career orientation facilities

The student section of the Faculty Council 2019-2020 has conducted a research into tutorship and career orientation, which showed that there are sufficient facilities for students, but that they are not used optimally. The big problem is its visibility. Therefore, List ACTIEF! wants to see change in this, both inside and outside of the tutorship.

- [Diversity and inclusion](#)

List ACTIEF! would like to see an optimisation of the diversity policy in view of all different backgrounds, identities and (physical) disabilities, based on input from the students themselves. Also List ACTIEF! would like Utrecht University to make more efforts for everyone in its education and organisation, so that everyone can feel safe and welcome.

Definition

Diversity and inclusion should be defined not only on the basis of religion and ethnicity, but on the basis of all aspects that make up the identity of our students. Increasing diversity and creating an inclusive culture should not solely be achieved by recruiting international students. We want to make studying at our Faculty of Social and Behavioural Sciences as accessible as possible for every unique student.

- [Sustainability](#)

List ACTIEF! would like sustainability to remain on the agenda of the Faculty of Social and Behavioural Sciences! Together we want to ensure that we meet the needs of current students, without sacrificing those of future students. Think of reducing the use of plastic cups, consulting with student associations about sustainable initiatives, promoting the green office and providing information so that everyone can contribute to a greener university!

- [Quality agreements](#)

List ACTIEF! has given a lot of input about the distribution of the quality funds and we have approved the plans that the Faculty Board has drawn up for the quality agreements. In the coming years, the amount of the quality funds will only increase,

and in three years time new plans will have to be made about the distribution of these funds. List ACTIEF! ensures that the quality agreements are adhered to.

Vote 2nd to 4th June on List ACTIEF! at www.uu.nl/stem

Candidate list ACTIEF!

- #1 Veronique Stokkers
- #2 Daniël van den Heuvel
- #3 Nadesja Fijn
- #4 Nikki Stekelenburg
- #5 Fabiënne Wachters
- #6 Sofie Spierenburg
- #7 Marjam Heshmatikhah
- #8 Melanie Kamp
- #9 Eline Wessels
- #10 Benthe van Thuijl
- #11 Anouk Rademaker
- #12 Brigitte de Kok
- #13 Daan Verkaik
- #14 Daniëlle van der Sluis

List ACTIEF! for passionate and accessible student consultation
